

g-Prox<sup>®</sup>  
EZ  
Easy as 1, 2, 3!

Incisionless Surgery just got easier

Room Setup and Standard Equipment

1. Standard upper endoscopy setup
  - a. Endoscopy tower
  - b. Gastroscope
  - c. Flexible endoscope, max. 5 mm diameter / min. 105 cm working length
  - d. Suction
2. General anaesthesia equipment
3. High flow CO2 insufflator
4. Standard endoscopy support material (Lubricant Gel, ...)

The IOP device is intended to be used for:

Catalog #	Product Name	Description	UOM
500100	TransPort <sup>®</sup> -R	TransPort <sup>®</sup> Endoscopic Access Device	1 each
208220	g-Prox <sup>®</sup> EZ-33	g-Prox <sup>®</sup> EZ-33 Endoscopic Grasper – Needed for POSE2.0 procedures	1 each
208200	g-Prox <sup>®</sup> EZ-16	g-Prox <sup>®</sup> EZ-16 Endoscopic Grasper – Needed for ROSE procedures	1 each
208100	g-Cath <sup>™</sup>	g-Cath <sup>™</sup> EZ Delivery Catheter with Snowshoe Suture Anchors <sup>™</sup>	6/Box
301010	g-Lix <sup>™</sup>	g-Lix <sup>™</sup> Tissue Grasper	3/Box

The Incisionless Operating Platform<sup>®</sup> (IOP)  
Enabling Incisionless Surgery

product overview

g-Prox<sup>®</sup>  
EZ-33  
Endoscopic Grasper

TransPort<sup>®</sup>  
Multi-lumen Platform

g-Cath<sup>™</sup>  
EZ  
Snowshoe SutureAnchors<sup>™</sup>

Feature	Benefit
Large jaws yield deep, full-thickness tissue bites – 33 mm jaw length	Serosa-to-serosa apposition enables durable anchor retention and tissue healing
Direct visualization during needle deployment	Enables safe and accurate anchor placement
Ability to reload without leaving target area	Fewer instrument passes and ability to maintain visualization of operative site
True One-Handed Operation: one-handed needle deployment, anchor deployment, anchor cinching, and suture cutting	Increases efficiency of movement and enables short operative time
Surgeon-controlled suture cut-away with shield	Saves time

Device Features:

- Ergonomic, familiar controls
- Multiple, large operating channels
- Precise 4-way steering and torque stability for many access angles
- Visual horizon control – “up is always up”
- Steering and instrument locks ensure a stable platform
- CO<sub>2</sub> insufflator compatible
- Outside Diameter: 18,0 mm
- Angulation: 210° (up/down/left/right)

Device Features:

- Easy, one-handed operation
- Engages muscularis layer
- Allows exceptional push & pull forces
- Flexible and torque-stable
- Grasps tissue securely at a user-controlled depth
- Works well in small spaces

Feature	Benefit
Full Thickness Plication	Durability of plication is achieved by ensuring the suture is passed through the muscularis layer of the gastric tissue
Snowshoe Suture Anchors <sup>™</sup>	Act like pledgets to hold tissue during wound healing process
0 Polyester Braided Suture	Familiar, durable suture material that withstands the pressure exerted by the high motility of gastric tissue
User Controlled Cinching	Accommodates different types and thicknesses of tissue. Allows for a customized plication
